PALMERSTON ROAD UPGRADES
ROYSTONEA AVENUE/ TEMPLE TERRACE INTERSECTION - WORKS START

Delivery of the Northern Territory Governments’ Palmerston Road Upgrades program is underway, which will provide a safe traffic environment and allow for a greater movement of vehicles in and around the Palmerston City.

Work on the Roystonea Avenue/Temple Terrace intersection upgrade will start from Wednesday, 25 November 2015.

Day works
Construction will take place Monday to Friday, with majority of works occurring outside of busy peak morning and afternoon travel times.

Night works
In an effort to further reduce impact on daytime traffic flows, night works may take place between 7pm and 6am, Monday to Friday as required. The contractor will be using a concentrated directional reversing alarm on vehicles that will minimise noise.

Road users are advised that lane closures, speed restrictions and some delays are expected during construction. Motorists are urged to travel with care in the area and adhere to all traffic management.
